Prize Hoops Software Update Procedure

1. To update your Prize Hoops software, go online to the Technical Support page for Prize Hoops at Team Play's web site www.teamplayinc.com. Download the update file to your computer.

2. Unzip the downloaded file and save the update file (*filename.tar.gz*) to a USB flash drive. The file should not be saved in a folder on the flash drive, but, rather, should be in the main directory.

3. With the Prize Hoops game turned on and running, insert the USB flash drive into an open USB port inside the game.

4. Press the OPERATORS MENU button inside the cabinet, and navigate to the "Software Update" screen.

5. Move the highlighted line until the correct update file (*filename.tar.gz*) is highlighted, and press the SHOOT button.

6. The update procedure will take approximately 30 seconds.

7. When the update is finished, you will hear a sound, and the screen will go black. Remove the USB flash drive from the USB port. The Prize Hoops game will reboot to the new, updated version.
